SUMMARY

Senior Frontend Developer with over 6.5 years of experience in product tech companies. Strong experience in creating high-quality solutions from scratch, as well as improving performance in complex B2C application.

WORK EXPERIENCE

SoftSwiss

Oct 2022 – present

Senior Frontend Developer

Working on a white-label Sportsbook platform for multinational users across the world. Developing 3 projects: sports betting application, CMS, and back office.

- Led the **performance optimization** process, improved **page load speed** of the main complex app: the Lighthouse score on mobiles increased **from 6 to 68**. It allows for work in countries with low internet speeds and low-end devices.
- Decomposed, planned and implemented new complex features using **Next.js**, **React Query**, and **Zustand**.

Arrival

Jan 2019 – Oct 2022

Frontend Developer, then Senior Full-Stack Developer

Arrival is a British electric vehicle manufacturer implementing a new micro-factory approach to production.

- Built an in-house procurement platform from scratch using **React**, **TypeScript**, **Redux**, and **microservices** on **Kotlin** and **Camunda BPMN**. This reduced the supplier onboarding cycle time by **90%**, decreased costs by **40%**, and improved data quality by **95%** for over **5000** onboarded suppliers.
- Developed a UI Kit library with **29 React** components, **100%** test code coverage and automatic doc generation.
- Automated the invoice management system by creating data pipelines using **Node.js** and **Rossum AI** for extracting, recognizing and exporting invoices, which lowered invoice processing time from **15 minutes** to **1 minute**.
- Integrated the best development practices: error monitoring, release process pipelines, linters, tracing, and e2e tests.

VeeRoute

Sep 2017 – Jan 2019

Frontend Developer

VeeRoute is a start-up that produces solutions for the logistics of large e-commerce clients.

- Assisted in the company's survival by collaborating with the team to create an app for the National Kazakhstan Post within **3 months**. This enabled the company to raise funds. The solution increased parcel delivery by **5 times**.
- Developed a UI Kit library with **18** components based on the new design system.
- Rewrote the main company project from **AngularJS** to **Angular 6** and **NgRx**, integrating a new design system.

EDUCATION

Saint Petersburg State University of Aerospace Instrumentation

2015 – 2019

Bachelor's Degree in Software Engineering (GPA 4.28 / 5.0)

SKILLS

JavaScript · TypeScript · React · Next.js · Performance Optimization · React Query · Zustand · Redux

ADDITIONAL ACTIVITIES

Volunteer Mentorship

Mentored **37** developers one-on-one at [GetMentor](#), gave **6** tech talks, and mentored students at [GuideDao coding school](#).

Open Source

- Developed [node-file-router](#) (**119 stars**, [2nd Tool of the Week](#), [DevHunt](#))
- Contributed to [DefinitelyTyped](#) / [Jaeger](#) (**46.6k stars**)
- Other created projects: [web-performance-handbook](#), [image-proxy-service](#), [react-props-diff-logger](#)

Tech Writting

Wrote **11** articles on [Dev.to](#) and [Hackernoon](#) with **26k** views in total. **3** articles were featured as top stories.

Hackaton — Digital Breakdown 2019

3-rd place in the world's largest hackathon, as [confirmed by Guinness World Records](#).
